Mathematics Target Ladder – Place Value

Your teacher will give your child a starting target. They need to practise and learn and achieve this target then move on up to the next target on the ladder. The aim is for them to move as high up the ladder as they can by the end of the term.

Stage	Objective	Success statement
10	Give a decimal fraction lying between two others e.g. between 3.4 and 3.5	I can tell you a number that lies between two decimal numbers.
9	Know what each digit represents in a number with up to three decimal places	I can tell you the value of each digit in numbers with up to three decimal places.
8	Know the value of each digit in a six digit number and a number with up to two decimal places	I can tell you the value of each digit in a six digit number. I can tell you the value of each digit in numbers with up to two decimal places.
7	Know what each digit in a four digit number represents and can partition into thousands, hundreds, tens and ones	I can tell you how many thousands, hundreds, tens and units there are in any number up to 9,999.
6	Know what each digit in a three digit number represents and can partition into hundreds, tens and ones	I can tell you how many hundreds, tens and units there are in any number up to 999.
5	Know what each digit represents in a two digit number	I can tell you how many tens and units there are in any number up to 99.
4	Know what each digit represents in numbers from 10 to 20	I can tell you how many tens and how many units there are in the numbers 10 to 20
3	Recognise and use numerals 0 to 15	I can use the numbers 0 to 15 to count objects
2	Recognise and use numerals 1 to 9	I can use the numbers 1 to 9 to count objects
1	Select the correct numeral to represent 1 to 9 objects	I can find 1, 2, 3, 4, 5, 6, 7, 8 or 9 things.
Beginner	Select the correct numeral to represent 1 to 5 objects	I can find 1, 2, 3, 4 or 5 things.
